

Report of the Commission on Airspace and Navigation Systems (CANS) to the 2009 FAI General Conference

Date 27 September 2009

FAI Commission on Airspace and Navigation Systems was established during the FAI General Conference 2008 in Italy. At the same time the duties were established: "Co-ordination and dissemination of knowledge and information within and on behalf of FAI on Airspace rules, regulations and policy, and Air Navigation Systems, as they may affect the types of aviation in which FAI is involved".

The Commission had an inaugural meeting in Paris 19th of March 2008. First official meeting was held after the General Conference October 6th and 7th 2008 at Frankfurt. A plenary meeting was held in Frankfurt 8th and 9th of March 2009. The German Aeroclub hosted both meetings.

The start of the Commission work has included an extensive discussions about airspace issues in different parts of the world and about different technical matters. Only nine countries and three commissions have been represented in the plenary meetings. To be able to fulfil it's tasks, CANS needs more participating delegates around the world.

All information concerning meetings and presentations are gathered on the website of CANS. The aim is to provide information as much as possible to help people in different countries in their work for Airspace and Navigation issues.

The next CANS Plenary is scheduled for 1-2 February 2010 in Frankfurt.

Lars Holmstrom
President CANS
